30 DAY INSTALLATION NOTICE FOR BACKFLOW PREVENTION DEVICE

We are contacting you regarding compliance with the rules of the Environmental Protection Agency and the City of Alliance. Those rules require that a reduced pressure backflow prevention device (RP) be installed on your water service directly after the water meter, and at the service connection of any fire system(s) (RP w/ detector check) that exist on the property. This device must be tested by an approved tester (list attached) at the time of installation and every twelve months thereafter. If this device is already installed, please forward a current test report to, or contact the Alliance Distribution Department at 1010 N. Walnut St., Alliance, OH 44601.

There are circumstances where this requirement may be waived. It is recommended that you contact Doug Hastings or Dave Crewson at (330)823-5216 for additional information before proceeding.

You have 30 days to complete this installation. Please understand that **this notice also serves as your 10-day shut-off notice.** If the tests are not received by this office within forty (40) days of this notice, the City will be forced to **discontinue water service and/or impose a \$100.00 per day fine.** Please respond as soon as possible.
