## Service Line Verification Form

Once completed, please email form to [LineReplacement@allianceoh.gov](mailto:LineReplacement@allianceoh.gov). Include a picture of where the water line comes through the wall or floor.

Name: \_\_\_\_\_

Phone: \_\_\_\_\_

Email: \_\_\_\_\_

Property Address: \_\_\_\_\_

Please Mark the type of Pipe:  PVC  Galvanized  Copper  Lead  
How did you determine your water line material?  
 Magnet  Scratch  Other

How to identify your water service line pipe material

This is the line that extends into your basement or crawl space before the meter.

Guide to identify your service line (see pics below)

Lead Pipe

A magnet will not stick to a lead pipe. Scratch the pipe with a coin, if the scraped area is shiny silver and flakes off, the service line is lead.

Copper Pipe

A magnet will not stick to copper

Galvanized Steel Pipe

If a magnet sticks to the surface, your line is galvanized steel. A scratch test is not needed if magnetic, the pipe will remain dull if scratched.

PVC Pipe

Come in multiple colors, White, Blue, Red, Yellow, joined with multiple clamps or glue fittings
